The above work is a delineation of the scenes are incidents connected with the imprisonment, in 1852 of Manuel Pereira, stoward of the British brig Jan son, in the jail of Charleston, S. C.

The following notice of this work is copied from the National Era of February 17:

"The above is the title of a work now in press founded upon that inflamous statute of South Carolina, by which her citizens claim a right to imprison colorea seamen, of all nations, and even those cast upon their shores in distress. We have perused the book in advance of its publication, and find that it gives a life like picture of Pereira, the vessel in which he sailed the storms she encountered, and her wrecked condition when brought into the port of Charleston, S. C.; to gether with the imprisonment of Pereira, several seamen belonging to the New England States, and two French seamen; the prison regimen, character of the Charleston police, and the mendacity of certain officials, who make the law a medium of peculation. The work is replete with incidents of Southern life and character, pointing Southerners to the things that call for correction at their own hands, with a force that cannot be mistaken. The work is written by one what sannot be mistaken. The work is written by one what sannot be mistaken. The work is written by one what sannot be mistaken. By Jacob Abbott.

"Rollo on the Atlantic" is the first book of a series to be published under the general title of Rollo's

ries to be published under the general title of Rollo's Tour in Europe.

Extract from the Preface:

"The books are intended to be books of instruction, rather than of mere amusement; and, in perusing them, the reader may feel assured that all the information which they contain, not only in respect to the countries visited, and to the customs, usages, and modes of life that are described, but also in regard to the general character of the incidents and adventures that the young travellers meet with, is in most strict accordance with fact. The main design of the narrative is thus the communication of useful knowledge; and everything which they contain, except what is strictly personal, in relation to the actors in the story, may be depended upon as exactly and scrupulously true."

April 15, 1853. CHARLES FRODSHAM.

The undersigned, having been appointed sole Agent in the United States for the sale of Charles Frodsham's Improved Timekeepers, would respectfully call public attention to his extensive and valuable stock of Compensated Chronometer Watches, made by Charles Frodsham, and styled his "New Series." In the Watches of the new series, Mr. Frodsham has succeeded—by a more perfect method of compensation, a more correct adjustment in isochronism, and an entirely new and peculiar construction of the train, by which more power is obtained without increase of size—in producing timekeepers of wonderful and unrivalled accuracy. The great importance of the improved Watches is a perfect regularity of time, under every variety of climate, motion, and position. So perfect are the adjustments, that the most violent exercise—such as horseback riding, jumping, &c.—produces on them no sensible effect. They are therefore peculiarly adapted to rairoad purposes.

The scientific French critic, Mons. Borsendorf, in his review of the Great London Exhibition of 1854, styles the contribution of Mr. Charles Fredsham as "bearing the stamp of peculiar merit, and as being the flower of the English school."

The British Government have awarded Messrs. Arnold and Charles Fredsham the sum of £3,170, for ance generally, and especially the Logislative Prohibi-tion of the Traffic in Intoxicating Beverages, to pro-pare the minds of the masses for such Prohibition, by showing its expediency and Necessity, and to secure, by all the influence it may legitimately exert, the vigorous enforcement of Prohibitory Laws when ob-tained. ITS FIELD.—Dealing with general principles

The British Government have awarded Messrs.

Arnold and Charles Frodsham the sum of £3,170, for the excellence of the principle of their timekeepers.

One of Mr. Frodsham's correspondents writes as follows: Its Field.—Dealing with general principles, with arguments alike applicable to every community where the traffic exists, and with facts illustrative of these arguments and principles, the paper will be National in its spirit, in its scope, in its purpose, and, we trust, it will be National in its circulation and influence. Such is our aim and expectation. We desire to see the Principle of Prohibition established in State after State, till it becomes the recognised policy of the Nation. It is our ambition to bear a part in this great work, and to this end The Prohibitions is established, not as the organ of a society merely, but of a LONDON, April 26, 1852. LONDON, April 26, 1852.

Sin: I have much piessure in giving in account of the Gold Compensation Lever Watch No. 3,325, you have made for me, and in which I expressly stipulated that it should maintain a uniform rate of going under every variety of motion and climate. This it has done in a most remarkable manner; its rate of going for the first six months was five seconds per month, and in the next six months it changed its rate a little faster, viz: eight seconds per month, and at the end of 365 days it was found to be fast of Greenwich mean time one minute and fifteen seconds.

work, and to this end The Prohibitionist is established, not as the organ of a society merely, but of a Great Repormatory Movement.

Its Necessity.—The existing Temperance Journals have little, if any, circulation outside of the Temperance Ranks. Their price almost necessarily restricts them to the friends of the cause. The Prohibitionist is designed for circulation (instead of tracts) among the indifferent and the hostile. For this purpose it is put at a price so low as to enable the friends of Temperance in every school district, hy combined action and at an inconsiderable expense, to place a copy in each family that will consent to receive it. the end of 365 days it was found to be fast of Greenwich mean time one minute and fifteen seconds. Though I was not led by any previous promise to expect such performance, yet I believe it is only the usual character of your improved watches, which you term your "new series."

Sir: I herewith give you an account of the remarkable performance of the watch I purchased of you, made by Charles Frodsham, No. 7,014. Its total variation for 17 months, by weekly observations, was but one minute and fifty-five seconds.

Billings Briggs.

Although these works are distinguished by the positive is shades above indicated, yet but a small portion of their contents is devoted to political subjects. It is their literary character which gives them their obie value, and in that they stand confessedly far above all other journals of their class. Blackwood, still under the masterly guidance of Christopher North, main tains its ancient celebrity, and is at this time unusually attractive, from the serial works of Bulwer and other literary notables, written for that Magazine, and first appearing in its columns both in Great Britait and in the United States. Such works as "The Cartons" and "My New Novel," both by Bulwer; "My Peninsular Medal." "The Green Hand," and other serials, of which numerous rival editions are issued by the leading publishers in this country, have to be reprinted by those publishers from the pages of Black wood, after it has been issued by Messrs. Scott & Co. so that subscribers to the Reprint of that Magazins may always rely upon having the earliest reading of these fascinating tales.

Such a Paper is demanded by the Farming Community.

The publishers confidently believe that the agriculturists of this country are becoming too much awake to the demands of their own calling to be longer satisfied with the slow monthly issues of a paper professedly devoted to their interests, or to trust alone to the irresponsible extracts in a "farmer's column," so popular just now in papers chiefly devoted to business, politics, or literature; and they look for the united support of all the intelligent farmers of this country in their continued offort to furnish a weekly paper of a high and reliable character, which shall be progressive, and at the same time cautious and conservative in all its teachings.

Essentially an Agricultural Paper.

The Agriculturist will not depart from its legitimate sphere to catch popular favor by lumbering upits pages, with the silly, fictitious literature, and light, miscellaneous matter of the day; it has a higher ain; and a small part only of its space will be devoted to matters not immediately pertaining to the great business of Agriculture. The household as well as the out-door work of the farm will receive a due share of attention. The humbugs and nostrums afloat in the community will be tried by reliable scientific rales, and their worthlessness exposed. It is the aim of the publishers to keep this paper under the guidance of these who will make it a standard work, which shall communicate to its readers only that which is safe and reliable.
